

Making an Impact

Some of our Class of 2015 graduates

Acceleration Academies provide academic and support services to students either at risk of not earning a high school diploma or wishing to return to school after a gap in their education.

Our staff understands that Graduation Candidates have other responsibilities that make obtaining a diploma seem impossible, but we are here to help.

By offering flexible scheduling, online courses, academic and social emotional support services, **Acceleration Academies** is helping young people get back on the path toward their high school diploma.

Acceleration Academies currently operates eight academies across Washington, Florida, and North Carolina.

We plan to partner with 2-3 new school districts in the Summer of 2017.
